

QUALITY AND ENVIRONMENTAL POLICY

The company has introduced a quality and environmental management system to achieve the highest possible level of quality of its products, equipment and technologies for environmental protection and be a long-term partner to the overall economy and environment.

Our goal is to fully understand the requirements of the customer to whom we will provide our services. Preserving the environment is our success, and it depends on the engagement of all employees, timely indication of non-compliances and problems, and effective resolution. Such an approach allows us complete customer satisfaction, and thus the successful operation of the entire company.

As an organization aware of the importance of environmental management, we are committed to fulfilling environmental responsibilities for this and future generations, applying pollution control processes and technology to the extent possible, meeting applicable legal and contractual requirements, and setting internal standards and requirements when necessary, continuously improve and prevent pollution, implement appropriate corrective actions, strive to continuously improve the environmental management system in agreement with the local community.

Continuous improvement of product quality, improvement and development of the technological process of production is a permanent goal of management and all employees.

The quality and environmental management system is based on the requirements of the ISO 9001:2015 and ISO 14001:2015 standards, as well as the ISO 3834-2 welding standard and the EN 1090-2 standard for steel bearing structures. We will maintain the established management system with the help of an authorized, internationally recognized and neutral certification institution.

The management of the company fully supports the policy and objectives of quality and environmental management expressed in the *Rules of Procedure of the integrated management system for quality, environment, welding and steel bearing structures*.
